PROJECTS

 Topic: Heart Disease Prediction Duration/Period: Semester-V

Objective: To design an Intelligent system model using machine learning algorithms for predicting

heart disease of patients

Tools or techniques used: Python, Logistic

Regression, Jupyter Notebook

Outcome: An Intelligent predicting system is

developed

 Topic: Rainfall Prediction System Duration/Period: Semester-V

Objective: To design a Prediction model that detects

the rainfall patterns using Machine learning

algorithm

Tools or techniques used: Python, Jupyter

notebook, Linear Regression.

Outcome: A Prediction model is developed

• Topic: Amazon Product Recommendation System

Duration/Period: Semester-V

Objective: To design a model that recommends quality products to the users based on reviews and

ratings using Machine learning algorithms Tools or techniques used: Python, Jupyter

notebook, Singular Value Decomposition, Natural

Language Processing.

Outcome: A Product Recommendation model is

developed

TECHNICAL SKILLS
